Drive the screws into the anchors, or directly into your wall until they are flush with the mounting bracket, and the bracket is flat against your wall. If your wall is at all uneven, be careful not to screw the bracket in so tightly that it bends.

On stucco, brick, or concrete, install the anchors using the provided drill bit and a power drill before installing the mounting bracket. On wood or siding, you can skip this step, and screw the bracket directly into your wall.

Install the Mounting Bracket
Take everything that came in the box, along with a power drill if you're installing on stucco, brick, or concrete, to the spot where you'll be installing your Ring Doorbell. Snap the provided level onto the mounting bracket and use it to help position the bracket. Then remove the orange tape, and use the mounting bracket as a template to mark the four corner holes.

Remove Your Existing Doorbell (optional)
If you're replacing a wired doorbell, first turn off the power at the breaker. Then remove your doorbell from the wall, and disconnect the wires. If you notice a diode when you remove your wired doorbell, take note of this, as it means you will need to use the included diode.

Set Up Your Ring Doorbell Using the Ring App
The Ring app will walk you through the setup process. Download the Ring app by visiting ring.com/app and when prompted, select Video Doorbell. Perform setup inside near your router. You'll need your network name and Wi-Fi password.

Network Name: ___________________
Wi-Fi Password: ___________________

To watch videos on installing and getting started with your Ring Video Doorbell, visit: ring.com/setup

In-app Setup
2 Push the Front Button to Run a Test
After you complete the setup, push the front button on your Ring Doorbell indoors near your router to check your video and chime. Then test your Ring Doorbell outdoors.

Testing Your Ring Doorbell
3 If video quality from your Ring Doorbell is not as good outdoors as it is indoors, you may need to move your router closer to your door, or invest in a Wi-Fi extender. Learn more at: ring.com/extender

Congratulations! You’ve successfully set up your Ring Doorbell. Push the front button to try it out.

Shared Users
To give others, such as family or friends access to your Ring Doorbell, select Shared Users in the Ring app, and enter their email(s). Shared users can answer live events and view recordings.

Motion Detection
To enable and customise motion detection, select Motion Settings in the Ring app.

Cloud Video Recording
This optional premium feature saves events captured by your Ring Doorbell. You can access these events on any device running the Ring app, or at ring.com/activity. To learn more about Cloud Video Recording, visit ring.com/cloud-recording.

Ring Chime
Ring Chime is an optional add-on that alerts you when you have a visitor, even if your phone is in the other room. Learn more at ring.com/chime
