POWER
Option 1–Internal Battery

If you’re running Stick Up Cam off the internal battery, make sure it’s fully charged before mounting it outside.

When running off the internal battery, Stick Up Cam can last 6-12 months between charges.

To recharge the battery, use the provided orange USB cord. While charging, the LED indicator on the back of the device will quickly pulse.

POWER
Option 2–USB Power

The longer cable provided in the box can be used to wire your Stick Up Cam directly to a power outlet.

A USB plug is required. In case you don’t have a spare one, search online for “USB plug” to find a number of inexpensive options.

Make sure the weather-resistant hood covers your Stick Up Cam’s power port to protect it from moisture.

POWER
Option 3–Ring Solar Panel

Ring Solar Panel connects directly to your Stick Up Cam, and with only a few hours of sunlight, keeps your Stick Up Cam continuously charged.

FEATURES

Customizing Settings

Select your Stick Up Cam in the Ring app to add Shared Users and customize Motion Settings.

Shared Users

You can add friends and family by selecting the Shared Users option on the Settings screen.

Shared users can answer live events and view recordings (if you have Cloud Video Recording enabled). They won’t be able to delete events or change settings.

Motion Detection

To enable and customize motion detection, select Motion Settings on the Settings screen.

Answering Motion Events

When Stick Up Cam detects motion, you can perform the following actions:

- Disable/enable your microphone
- Mute/unmute sound in the Ring app
- Zoom in/out
- Access the Ring Plus menu

Turning off motion alerts:

If you don’t want to receive notifications, you can toggle motion alerts off in the Ring app.

Cloud Video Recording

This optional feature saves events captured by your Stick Up Cam.

You can access these events on any device with the Ring app or by logging into your Ring account at: ring.com/activity

To learn more about Cloud Video Recording, visit: ring.com/cloud-recording
