1 Prepare the door and check dimensions

If drilling a new door, use the supplied template and the complete door drilling instructions available at www.kwikset.com/doorprep.

- **A** Measure to confirm that the hole in the door is 2-1/8” (54 mm).
- **B** Measure to confirm that the backset is either 2-3/8” or 2-3/4” (60 or 70 mm).
- **C** Measure to confirm that the hole in the door edge is 1” (25 mm).
- **D** Measure to confirm that the door is between 1-3/8” and 1-3/4” (35 mm and 44 mm) thick.

*If you are installing this lever below an existing lock or you plan to install a lock above this lever, make sure that the distance between holes is at least 6-1/2” (165 mm).*

2 Install the latch and strike

- **A** Hold the latch in front of the door hole, with the latch face flush against the door edge.
- **B** Are the latch holes centered in the door hole?
  - **YES** No adjustment is required. Proceed to next step.
  - **NO** Move the pin to extend the latch.
- **C** Is the door edge chiseled?
  - **YES** Chiseled
  - **NO** Not chiseled
- **D** Install strike on the door frame.

*If you are installing this lever below an existing lock or you plan to install a lock above this lever, make sure that the distance between holes is at least 6-1/2” (165 mm).*
3 Install the exterior keypad, mounting plate, and spindle

A Install exterior keypad.
B Route cable through mounting plate.
C Secure mounting plate with supplied screws.
D Install spindle.

4 Install interior assembly

A Remove battery cover and battery pack from interior assembly.
B Install interior assembly onto mounting plate.
C Push interior assembly onto mounting plate.
D Secure with screws.

5 Install levers

A Install interior lever.
B Secure interior lever.
C Install exterior lever.
D Secure exterior lever.

6 Test latch operation

Close door, test latch operation and make adjustments as needed.

The small bolt of the latch should not enter the strike hole. If it enters the strike hole, reposhite strike.

If latch is loose in the strike, adjust the strike tab so it grips the latch bolt better when the door is closed.
7 Pair the lock with your smart home system

A Initiate the pairing process at your smart home controller. Refer to your smart home system instructions for more information.

B When prompted by your smart home system to initiate pairing at the lock, press button “A” on the lock interior four times.

C If the pairing process is successful, re-name the lock in your system (if applicable).

D If the pairing process is unsuccessful, press button “B” nine times. Perform steps 7A-7C again. If pairing is still unsuccessful, consult the Programming and Troubleshooting Guide on the SmartCode 912 page at www.kwikset.com.

8 Add user codes (30 max)

It is recommended that you add and delete all user codes through your smart home control system. If your system does not allow this, codes may be added directly to the lock as shown here.

Programming Timeout
If no button is pressed for 5 seconds, the system will time out and you will need to restart the procedure.

A Make sure the door is open. Press the Program button the number of times that corresponds to the user code position being programmed.

B Enter user code. A total of 30 user codes may be programmed.

C Press Lock button once.

D What lights and sounds does the lock produce?

One green flash with one beep* or Three red flashes with three beeps* or Two beeps*

Example: If programming the third code, press the button three times.

Each user code must be a unique code between 4 and 8 digits, depending on your smart home system.

*Beeping sound will only be heard if switch #3 (on the lock interior) is in the on position. See “Switches and Status LED Colors” on page 4.

Mastercode
For enhanced security, a mastercode may be used when adding and deleting user codes. For more information about the mastercode, download the Programming and Troubleshooting Guide on the SmartCode 912 page at www.kwikset.com.

9 Test the lock (review normal operation)

Confirm that the code(s) added in step 8 can unlock the door.

Locking the Door

Unlocking the Door

Press Lock button once.

Enter user code.

Tip: You can press the Lock button before entering your user code to light up the keypad at night.

10 Re-key the lock (if needed) and install the battery cover

A Re-key the lock (if needed).

B Install the battery cover.

C Reinstall battery pack.

D IMPORTANT: Remove battery pack before re-keying.

Keep “R” in a safe place, as you will need it to access the back panel for additional programming.
1. Read all instructions in their entirety.
2. Familiarize yourself with all warning and caution statements.
3. Remind all family members of safety precautions.
4. Protect your user codes and mastercode.
5. Dispose of used batteries according to local laws and regulations.

CAUTION:
Prevent unauthorized entry. Since anyone with access to the back panel can change the user codes, you must restrict access to the back panel and routinely check the user codes to ensure they have not been altered without your knowledge. The use of a mastercode can help protect your system’s settings.

WARNING:
This Manufacturer advises that no lock can provide complete security by itself. This lock may be defeated by forcible or technical means, or evaded by entry elsewhere on the property. No lock can substitute for caution, awareness of your environment, and common sense.

Builder’s hardware is available in multiple performance grades to suit the application. In order to enhance security and reduce risk, you should consult a qualified locksmith or other security professional.

Network Information
Zigbee System Notes
Zigbee is a “Wireless mesh network,” and results may vary based on building construction and communication path, with 35+ feet being typical installed distance in a standard home environment and 250 feet+ when the lock has a clear line of sight with the smart home controller. It may be necessary to install additional Zigbee devices to enhance the communication path between the lock and controller for a more robust Zigbee network.

Adding the lock to the network
During the pairing process, press button “A” on the lock interior four times.

Removing the lock from the network
Press button “B” on the lock interior four times.

Important Safeguards
1. Read all instructions in their entirety.
2. Familiarize yourself with all warning and caution statements.
3. Remind all family members of safety precautions.
4. Protect your user codes and mastercode.
5. Dispose of used batteries according to local laws and regulations.

CAUTION: Prevent unauthorized entry. Since anyone with access to the back panel can change the user codes, you must restrict access to the back panel and routinely check the user codes to ensure they have not been altered without your knowledge. The use of a mastercode can help protect your system’s settings.
