Home security beyond the front door

Ring Video Doorbells and Cameras create a Ring of Security around your entire property.

Ring Alarm is the security system that takes your Ring of Security a step further, giving you another level of protection for your property.

Now, you can arm and disarm your system and monitor your home, all from your phone, tablet or PC.

4. Physical Installation
5. Troubleshooting

1. Say hello to your Ring Motion Detector.

2. Set up your Ring Motion Detector in the Ring app.

3. Connect your Ring Motion Detector to your Base Station.
4. Install your Ring Motion Detector on the wall.

Pull the tab on the detector. This connects the battery and turns on the device. Your Base Station will find it.

Connect the connection progress of the sensor.

Your sensor will try to connect to your Base Station. The sensor’s LED ring will show you the progress.

Place your detector (but don’t install it yet).

Hold the detector where you want to install it. Make sure the detector detects motion in the whole area.

Install your detector.

Use the bracket and tape or screws included in your kit. The detector can be mounted flush to the wall or angled in a corner.

Scan the QR Code or enter the PIN.

The QR Code and PIN can be found on the back of your device on the box, or on the card in the box.

Some additional details about your detector.
