Download the Ring App.

The Ring App walks you through setting up and managing your Ring Doorbell.

Search for “Ring” in one of the app stores below, or visit ring.com/app

[Apple App Store](apple.com/app-store) [Google Play](play.google.com)

Set up your Ring Doorbell.

In the Ring app, select Set Up a Device and follow the in-app instructions.
Remove the faceplate.

Grasp the bottom of the faceplate and pull to remove.

Install the included Corner Mount. (optional)

The Corner Mount can angle your Ring Doorbell to improve motion detection and provide a better view.

Mark two mounting holes on your wall through the slots on your Corner Mount (fig 1).

If you are replacing a Ring Doorbell, align the two small screw holes with two of the existing holes in your wall (fig 2).

(Skip to page 11 if you don’t plan on using the Corner Mount.)
Install the anchors. (optional)

On stucco, brick, or concrete, use a 1/4" masonry bit to drill holes in your wall, then insert the included wall anchors.

(If you’re installing on wood or siding, you can skip this step.)

Screw in the Corner Mount.

Grab the Plug-In Adapter and feed the end of the wire through the center of the Corner Mount. Using the long mounting screws, secure the Corner Mount to the wall through the slots (fig. 3). If you’re re-using existing holes, secure it with the adjacent screw holes (fig. 4).

If you are running the wire up your wall (instead of through it), DO NOT over-tighten the screws.

DO NOT USE any screw other than the included long mounting screws when securing your Ring Doorbell.
Connect the Plug-In Adapter wires.

Attach the power wires from the Plug-In Adapter to the terminals on the rear of your Doorbell. It doesn’t matter which wire connects to which terminal.

⚠️ DO NOT plug in the power adapter yet!

Mount your Ring Doorbell to the Corner Mount.

Secure your Ring Doorbell to the Corner Mount with the two included short mounting screws.

If you ran the wire through your wall, be sure to feed any excess wiring into the wall first.

Once you’re done, skip ahead to page 15.
**Mark the screw holes.**

Using your Ring Doorbell as a template, mark the location of the two mounting holes on your wall.

---

DO NOT USE any screw other than the included short mounting screws when securing your Ring Doorbell.

- **5/8" Short mounting screw**
- **1-3/8" Long mounting screw**
- **3/16" Security screw**
Install the anchors. (optional)

On stucco, brick, or concrete, use a 1/4" masonry bit to drill holes in your wall, then insert the included wall anchors.

(If you’re installing on wood or siding, you can skip this step.)

Connect the Plug-In Adapter wires.

Attach the power wires from the Plug-In Adapter to the terminals on the rear of your Doorbell. It doesn’t matter which wire connects to which terminal.

DO NOT plug in the power adapter yet!
Plug in the power adapter.

Choose an outlet as close to your door as possible. It may take a moment for your Ring Doorbell to power on. You’ll know it’s ready once it lights up and speaks to you.

Secure the cable.

Secure the cable to the wall with the provided cable clips.

Screw in your Ring Doorbell.

Mount your Ring Doorbell with the two included long mounting screws.

If you ran the wire through your wall, be sure to feed any excess wiring into the wall first.

⚠️

DO NOT USE any screw other than the included long mounting screws when securing your Ring Doorbell.

If you are running the wire up your wall (instead of through it), DO NOT over-tighten the screws.

☑️

1-3/8" Long mounting screw

✗

5/8" Short mounting screw

✗

3/16" Security screw
Secure your Ring Doorbell.

Re-attach the faceplate, then use the included screwdriver to drive the small security screw into the bottom of your Ring Doorbell.

⚠️ CAUTION!
If you use the wrong screws to secure the Video Doorbell, you could damage the battery during installation, create a fire hazard, and be seriously injured.

- ✅ 3/16" Security screw
- ❌ 1-3/8" Long mounting screw
- ❌ 5/8" Short mounting screw

Review, share and download.

Your new device comes with a free 30-day trial of Ring Protect video recording service.

To continue your subscription and save your videos, please visit ring.com/protect-plans
What is Ring Protect?

Ring Protect is a subscription service that stores videos from your Ring devices.

Why do I want it?

Ring lets you interact with visitors and monitor your property in real time, while Ring Protect allows you to review and share those videos anytime.

How much does it cost?

Ring Protect Basic covers one Ring device for $3 USD/month or $30 USD/year.*

Ring Protect Plus covers all Ring devices at one property, and costs $10 USD/month or $100 USD/year.**

How do I sign up?

Simply log into your Ring account at ring.com/protect-plans, and follow the on-screen instructions.
